ABSTRACTED-PUB-NO: JP03281585A

## BASIC-ABSTRACT:

Acrylic adhesive compsn. contains (A) acrylic resin and (B) aziridine cpd. having at least two (substd.) aziridinyl gps.. (A) is a copolymer consisting mainly of alkyl acrylate(s) and functional vinyl monomer(s) and has a wt. average mol. wt. of 200,000-500,000, a glass transition temp. of lower than -45 deg C, a gel content of 50-80 wt% and a swelling ratio of 40-150.

(A) is a copolymer of 50-99.9 wt% of 4-12C alkyl acrylate(s), 0.1-15 wt% of functional monomer(s) having hydroxyl, carboxyl, methylol or acid amide gps. and 0-44.9 wt% of other monomer(s) like lower alkyl (meth)acrylates, styrene and vinyl acetate. (B) has at least two of aziridinyl gps. of formula (I), (where R is H or 1-4C alkyl, or derivs.). Examples of (B) are N,N'-hexamethylene- 1,6-bis(1-aziridine-c arboxyamide), trimethylolpropane-tri- beta-aziridinylpropionate and bisisophthaloyl-1-(2-methylaziridine).

USE/ADVANTAGE - The acrylic pressure sensitive adhesive compsn. is suitable for mfg. acrylic pressure sensitive adhesive labels, tapes and sheets. Adhesive compsn. keeps a well balanced high level of both cohesion and tackiness in a wide temp. range from a low temp. to a high temp..
